

PRODUCTS AND SERVICES

Ruminant Solutions

Ration formulation guidance including amino acid balancing to enhance rumen and metabolic health, reproductive efficiency, and lactation performance.

ESSENTIAL NUTRIENTS

Smartamine® M Best-in-class encapsulated methionine, 60% metabolizable methionine for increased milk yield, fat, and protein.

MetaSmart® Isopropyl ester of HTMBa. Provides two sources of methionine activity (rumen and metabolizable) for increased milk yield, fat, and protein.

Smartamine® ML Best-in-class and most cost-effective encapsulated lysine, 35.2% metabolizable lysine for increased milk yield and protein.

RumenSmart™ Concentrated source of HMTBa for increased milk and milkfat. Dry and liquid (AT-88) forms currently available.

Microvit® A preferred source to premixers. Assure the animal's metabolic pathways are covered where macroingredients are lacking in essential vitamins.

SmartLine™

Microvit®

HEALTH BY NUTRITION

Selisseo® Pure organic selenium in feed supplement. Selisseo contains 100% hydroxy-selenomethionine (OH-SeMet), a pure and highly available form of organic selenium. Selenium (Se) is an essential nutrient for life, and it has been established that 0.1-0.3 ppm is necessary to support basic functions. On average Selenium Yeast products contain 60% SeMet and the amount of SeMet varies from batch to batch, while Selisseo consistently provides 100% OH-SeMet.

Selisseo®

MYCOTOXIN MANAGEMENT SOLUTIONS

ADI-FLOW®

ADI-FLOW® HP

Multi-function, multi-species agent for use during stress and production challenges.

TARG-IT-FLOW®

Anti-caking and flow agent for multiple species.

SOLUTIONS

- ✓ Best solution against a broad spectrum of feed contaminants
- ✓ Supports optimal functioning of immune, reproductive, antioxidant and digestive systems, under both normal and stress conditions
- ✓ Keeps liver, GIT, kidneys and all other organs functioning effectively
- ✓ Improves animal fertility and overall performance

PALATABILITY

DAIRY AP®

Spicy red fruit profile. Best solution for pelleting. Developed for robot milkers.

DAIRY-KRAVE®

Licorice and citrus profile. All-purpose, cost-effective dairy flavor for non-pelleted feed. Great for calf starter feeds.

DAIRY-KRAVE® 400

Anise, cinnamon, wintergreen profile. Pelleted feed applications.

POWERSWEET®

High intensity sweetener, works well in combination with flavors.

DRY CALF ADE

Milky coconut with fruit-like top notes. Sweetener enhanced. Great for calf milkreplacers.

CARMEL ADE

Carmel flavor for calf starters.

MilkPay.com

This FREE online calculator determines the income over feed costs when balancing amino acids or other nutritional changes in dairy rations.

RUMINANT SPECIALTIES AND SOLUTIONS

DynOmik™ is for dairy farmers and their nutritionists who want both a better bottom line from higher milk production as well as greater sustainability. It increases both intake and the nutrients available to cows. Greater nutrient availability shifts VFA production to propionate which decreases unproductive carbon output and reduces the carbon footprint of the farm. This also results in increased milk production as demonstrated through university research and on-farm demonstrations.

ULTRAMIX®

Butyric acid, including coated forms, to help support digestive integrity.

APEX®

Blend of essential oils, herbs, & spices designed to stimulate digestive processes and affect gut microbial activity, resulting in improved animal performance.
