Recognizing *Excellence* in Dairy Amino Acid Research

Adisseo is thrilled to introduce the first annual Charles Schwab Young Scientist Award, designed to recognize and celebrate young researchers' pioneering innovative approaches to understanding the roles of amino acids in dairy cow nutrition, physiology, and metabolism.

Recognition

We aim to honor and reward a student who conducts innovative research on the impact of feeding amino acids to productive ruminants at the 2025 ADSA meetings, June 22-25th. The student researcher with the best work will receive a cash award of \$1,500. We look forward to your participation and are excited to see the groundbreaking research contributions to dairy amino acid science.

Application Process

- Application forms will be available online at <https://milkpay.com/youngscientist-award-competition/>
- Three finalists will be invited to participate at the Adisseo ADSA Wine & Cheese reception.
- Applications are only accepted after the abstract submissions are approved by the ADSA.
- The results will remain confidential until presented at the ADSA.

Award Details

- Three finalists will be notified and announced on the Milkpay.com page prior to the ADSA 2025 meeting, and will receive free lodging during the meeting.
- One winner will be selected, receiving a cash prize of \$1,500.
- A committee comprised of four members from Adisseo and two University faculty members will select the winner.
- The winner will be announced at Adisseo's ADSA Wine & Cheese reception, and their research will be presented during the event.

Application deadline is February 15th, 2025. We look forward to your participation and are excited to see the groundbreaking research contributions to dairy amino acid science.
