

BEEF NUTRITION PORTFOLIO

Solutions for health,
performance and profitability

MetaSmart® Dry & Liquid

Rumen-protected Methionine

Methionine, essential nutrients involved in growth, reproduction and immune system.

Receiving calves

Methionine to support stress during the transition period.

- Supports stressed calves during the receiving period
- Reduces morbidity and need for treatments
- Improves immune response and recovery
- Enhances gain and feed efficiency in the feedlot

DOSE:

Dry: 10g/head/day

Liquid: 6g/head/day

Beef cow-calf

Methionine source for year-round supplementation.

- First-limiting amino acid in forage-based diets
- Improves fertility and reproductive performance
- Enhances milk quality and volume – increases weaning weight

DOSE:

Dry: 10g/head/day

Liquid: 6g/head/day

Selisseo®

Organic Selenium

Selisseo – Pure organic selenium in feed supplement. Selisseo contains 100% hydroxy selenomethionine (OH-SeMet), a pure and highly available form of organic selenium.

Selenium (Se) is an essential nutrient for life and it has been established that 0.1–0.3 ppm is necessary to support basic functions.

On average, selenium yeast products contain 60% SeMet and the amount of SeMet varies from batch to batch, while Selisseo consistently provides 100% OH-SeMet, to ensure consistent, optimum absorption.

- Highly bioavailable, consistent source of selenium
- Boosts immunity and antioxidant defense
- Improves fertility and semen quality
- Enhances carcass quality and shelf-life

DOSE: Work with your nutritionist to determine selenium dose based on animal production phase.

Microvit – DLCs

Vitamin Nutrition

Individual liquid vitamins and blends of vitamin oils, emulsifiers, solvents, and antioxidants to support nutrition requirements for health, growth and immunity.

Sources

- Vitamin A
- Vitamin D₃
- Vitamin E
- Vitamin AD₃
- Vitamin AD₃E

Advantages

- ✓ Formulation flexibility
- ✓ Designed to disperse rapidly in an aqueous medium
- ✓ Good stability (12-month guarantee) under normal conditions
- ✓ Adisseo vitamin oils can be combined to create customer-specific products
- ✓ Classified as non-flammable

The ideal vitamin source for feedlot liquid systems and feed manufacturers utilizing molasses or other liquid products.

DynOmik®

A potent natural source rumen modifier

DynOmik is a natural co-product of cashew nut manufacturing and contains a highly concentrated source of bioactive molecules including anacardic acid, a potent rumen modifier.

Anacardic acid shifts the rumen microbial population to produce more propionate without compromising acetate production, thereby improving ADG and feed efficiency.

DOSE: 2.5g/head/day

Mycotoxin Management Solutions

Adi-Flow® & Targ-it-Flow®

To minimize or remove the negative impact of mycotoxins – toxic chemicals produced by fungi.

ADI-FLOW®: Multi-function, multi-species agent for use during stress and production challenges.

TARG-IT-FLOW®: Anti-caking and flow agent for multiple species.

- Broad-spectrum protection against feed contaminants
- Supports immune, reproductive, antioxidant and digestive systems
- Maintains liver, GI tract, kidneys and other organ function
- Improves fertility and overall performance

Palatability Solutions

Flavor and intake enhancers for beef feeds

Improves starter feed intake and consistency. Enhances palatability for better growth in young calves.

- **DAIRY AP®:** Spicy red fruit profile. Best solution for pelleting.
- **DAIRY-KRAVE®:** Cost-effective flavor for calf starter feeds
- **DAIRY-KRAVE® 400:** Anise, cinnamon, wintergreen profile for pelleted feeds
- **DRY CALF ADE:** Milky coconut with fruit-like top notes, great for calf starters
- **CARAMEL ADE:** Caramel flavor to boost intake in calf feeds

Adisseo Commitment

Partnering with beef producers to deliver nutrition solutions that improve profitability.
