Selisseo®

The innovative
antioxidant

ORGANIC SE

SELENOMETHIONINE HYDROXYL ANALOGUE

Selisseo® is an organic selenium supplement that consists of pure hydroxy-selenomethionine, which alleviates the impact of stress on livestock and contributes to optimal immunity, growth, reproductive performance, and the quality of meat, protein and eggs.

Allowed by OMRI and PCO (Pennsylvania Certified Organic), however, the product is not Certified Organic.

integrity

PHYTOGENIC FEED ADDITIVES

ORGANIC APEX POULTRY

ORGANIC APEX SWINE

ORGANIC APEX CALF

Apex® products contain a blend of natural phytogenic compounds that have been optimized by research for efficacy and stability. Using in vivo and in vitro techniques, Adisseo explored the mode of action of several bio-active botanical components, alone and in different combinations. Through sound science, Adisseo developed a number of products for several livestock species that positively support digestive processes, gut microbial activity, and animal performance.

ENZYMES

EXCEL AP

EXCEL AP 25

EXCEL AP 25 T-FLEX

Rovabio® Excel is a feed additive containing a combination of 19 active enzymes produced by a single, non-genetically modified fungus (*Talaromyces versatilis*). As such, these enzymes are naturally compatible, offering optimal stability and efficacy. This combination of enzymes works synergistically for the degradation of non-starch polysaccharides (NSP) present in plant-based ingredients. A multi-species, multi-ingredient and multi-application solution, Rovabio® Excel is the most robust and versatile enzymatic product available in the organic market.

Certified and approved for organic production through OMRI and PCO (Pennsylvania Certified Organic)

production

PROBIOTIC

NE B NE50 B

Alterion® is a new probiotic solution, designed to bring consistent efficacy to poultry. Using a carefully selected strain of *Bacillus subtilis* with dual-action benefits, Alterion® supports a positive balance of microbiota along the gastrointestinal tract and animal performance.

Certified and approved for organic production through OMRI

MYCOTOXIN MANAGEMENT SOLUTIONS

O'GREEN

An anti-caking and flow agent for poultry, swine, and ruminant feeds. Targ-it Flow O'Green by Adisseo USA Inc. is permitted for use as a PCO – Feed Additive or Supplement.

- ✓ Part of a comprehensive feed quality management program that can help mitigate the effects of aflatoxins and moderate mycotoxin contamination.
- ✓ Supports optimal functioning of immune, reproductive, antioxidant, and digestive systems under normal conditions and stress.
- ✓ Supports liver, GIT, and kidney function under stress.
- ✓ Supports animal growth and nutrient utilization.

Allowed by OMRI and PCO (Pennsylvania Certified Organic), however, the product is not Certified Organic.

An essential
amino acid

METHIONINE

NP 99
AT88

Methionine is an amino acid that is required by various livestock species (especially poultry) for growth, development, and reproduction; it is essential for general protein synthesis (muscles, skeleton, various cellular enzymes, hair, feathers, albumin in the egg, etc.) and for a large number of biologic reactions that affect fat, carbohydrate, and protein metabolism. Because Methionine is deficient in most every feed ingredient, it needs to be supplemented into complete feed. Adisseo manufactures and supplies two forms of methionine that can be added to feed:

- ✓ Rhodimet® NP 99 (a dry source of Methionine; 99% pure/100% bioavailable)
- ✓ Rhodimet® AT88 (a liquid source of Methionine, which also has acidifying properties; 88% pure/100% bioavailable)

Both are approved for use in organic livestock production.

*Follow NOP guidelines for specific supplementation rates approved by the National Organic Program.
See NOP 7 CFR 205.237(a) and 205.603 (d)(1) for specific instructions.*
